REPORT TO MARR AREA COMMITTEE - 1 MAY 2018

HOUSING SERVICE QUARTERLY PERFORMANCE EXCEPTION REPORTING OCTOBER - DECEMBER 2017 (ABERDEENSHIRE PERFORMS)

1 Recommendations

The Committee is recommended to:

- 1.1 Acknowledge the positive performance achieved October to December 2017 (Quarter 3), identified in Section 2.3;
- 1.2 Consider those measures where performance is below expectations October to December 2017 identified in Appendix 1; and
- 1.3 Acknowledge the publication of the complete October to December Performance Report for all quarterly indicators on Ward Pages.

2 Background / Discussion

- 2.1 The purpose of this report is to advise Committee of how the Service is performing against key performance measures and associated targets as set out in the Infrastructure Services Business Plan, as approved by Infrastructure Services Committee.
- 2.2 The performance measures are linked to the Council's priorities. The quarterly performance monitoring report provides regular opportunity for elected Members to maintain scrutiny of significant activities in order to achieve good outcomes for the residents of Aberdeenshire.
- 2.3 Performance during the third quarter of 2017/18 can be summarised as follows:-

Key Service Objectives	Are we getting better?
To ensure access to good quality, affordable housing	Performance is mixed. The number of people accessing affordable housing has fallen compared to last year, but is still better than target for this quarter. A number of factors could have influenced this reduction, including a fall in the number of tenancies ending, which reduces the number of properties available for relet, as does the need to hold some properties for major works.

To ensure our service meets the outcome for the Scottish Social Housing Charter	Performance in Marr is better than target for all indicators, while the picture across the council as a whole is more mixed. The average number of days to complete non-emergency repairs remains better than target for Aberdeenshire as a whole,
	and Marr follows this trend. However, while the Aberdeenshire average has increased very slightly compared to the previous quarter, the Marr average has improved by a larger margin from 9.6 days last quarter to 8.8 days this quarter.
	In contrast, the average number of days taken to relet properties has increased in Marr compared to the previous quarter, although it still remains better than target. This contrasts with Aberdeenshire as a whole, where there has been a slight improvement compared to the previous quarter. Despite this, Marr remains one of the best performing areas in Aberdeenshire this quarter.
	Across Aberdeenshire as a whole, rent arrears have decreased slightly compared to the previous quarter, and this pattern is replicated in Marr with a reduction from 2.7% to 2.57%. Marr shows the largest decrease in arrears across Aberdeenshire this quarter, and is currently performing significantly better than at the same point last year, when arrears in Marr were 3.12% of the gross rent debit.
3. Reduce fuel poverty	A detailed report of Fuel Poverty activities will be provided with the Q4 performance report.

2.4 The Head of Finance and Monitoring Officer within Business Services have been consulted in the preparation of this report and had no comments to make and are satisfied that the report complies with the Scheme of Governance and relevant legislation.

3 Scheme of Governance

3.1 The Committee is able to consider this item in terms of Section B.1.2 of the List of Committee Powers in Part 2A of the Scheme of Governance as it

relates to a matter of performance (regarding council housing) which impacts on Marr Area.

4 Implications and Risk

- 4.1 An equality impact assessment is not required because the report is to inform committee on performance and there will be no differential impact, as a result of the report, on people with protected characteristics.
- 4.2 There are no staffing and financial implications.
- 4.3 This report is to inform the Committee on performance and there will be no impact on levels of risk at either the Corporate or Strategic level. Copies of the Risk Registers can be found here.
- 4.4 As this report is only to inform Committee on performance there is no impact on town centres thus a Town Centre Impact Assessment is not required.

Stephen Archer Director of Infrastructure Services
