Hi Frances,

Please take this email as the Environmental Health response.

Environmental Health still has a holding objection on the grounds of insufficient information. The information that is needed is in relation to the noise report and is as follows:

- Information confirming that the storage yard does not operate at night.
- With regard to appendix H (H1) of the noise impact assessment, information on the calculations and assessment made.
- With regard to appendix H (H1) of the noise impact assessment, information on the subjective assessment of tonality/impulsivity if reversing alarms are being used on site.
- Information on the subjective description of noise in the report with reference to activities not readily distinctive against the residual noise.
- Information on the height of the noise barrier.
- Information on the assessment of the noise impacts as per BS4142:2014+A1:2019 made in the assessment.

Thanks

Paul
