

Appendix 2

INSTRUCTIONS:

1. The flowchart below has been designed to lead you through various types of renewable energy technologies. By answering these questions, potentially suitable sources of renewable energy will be identified.
2. Start at the top left corner ('START') and answer the questions as 'yes' or 'no' and follow the appropriate arrow.
3. The columns on the right should be used for your reference to highlight technologies that should be examined further.
4. The first page highlights energy sources that are relevant to houses, flats and other developments, such as retail or industrial and should always be completed.
5. The second page is split between domestic and non-domestic i.e. houses/flats and other developments. You may need to consider the charts more than once depending on your proposal (e.g. a mixed-use development of houses, flats and retail will need to consider the charts for each use).
6. These energy sources should then be discussed in a statement submitted as part of the proposal outlining which sources are to be incorporated in a development, or why they have been rejected.
